

Maths Past Paper: Revision

A great way to revise is to work by yourself through past papers. Doing past papers in small timed bursts where you check your work will help break it up and allow you to check your work.

When you work through past papers we suggest: -

1. **Time.** Answer questions from the past paper for 20 minutes. This will be roughly 20 marks which is one quarter of the paper.

2. **Check.** Go through and mark what you have done. Write correct answers in green pen along with the method.

3. **Repeat or next.** Answer the next 20 marks if you got 12 marks or more. 12 marks or less answer questions from the next past paper for 20 minutes.

Ask any of the maths team if you want help with any question, we love doing maths!

Remember, **you have not studied** all the topics so some questions you will not be able to do. You can check with your teacher which questions you have not covered yet.
